

APC REIMAGINED PROGRAMME

2026

You were assessed as not ready; yet.

The reasons are fixable, if you know what they are.

Join us for a personalised programme that targets your development areas and sets you up with the tools and insight to approach the APC differently.

The same approach will lead to the same result.

Repeaters don't struggle because they are not smart enough. They struggle mostly because their approach is wrong and the skills that are needed to pass, are underdeveloped.

*The APC assesses judgement, communication and adaptability under pressure.
Not knowledge.*

They have the knowledge

They passed every academic hurdle to get here. The APC is not a knowledge test, It is a professional competence assessment.

They have the wrong habits

Under pressure they default to patterns that worked in every other assessment. Those patterns need to be identified and addressed.

The habits can be fixed

With the right diagnosis and targeted coaching, failure patterns can be identified and meaningfully addressed..

The same programme does not produce a different result

1

No diagnosis

Without reviewing your script thoroughly, it is impossible to identify whether the gap is technical, pervasive or your communication style under pressure.

2

Generic content

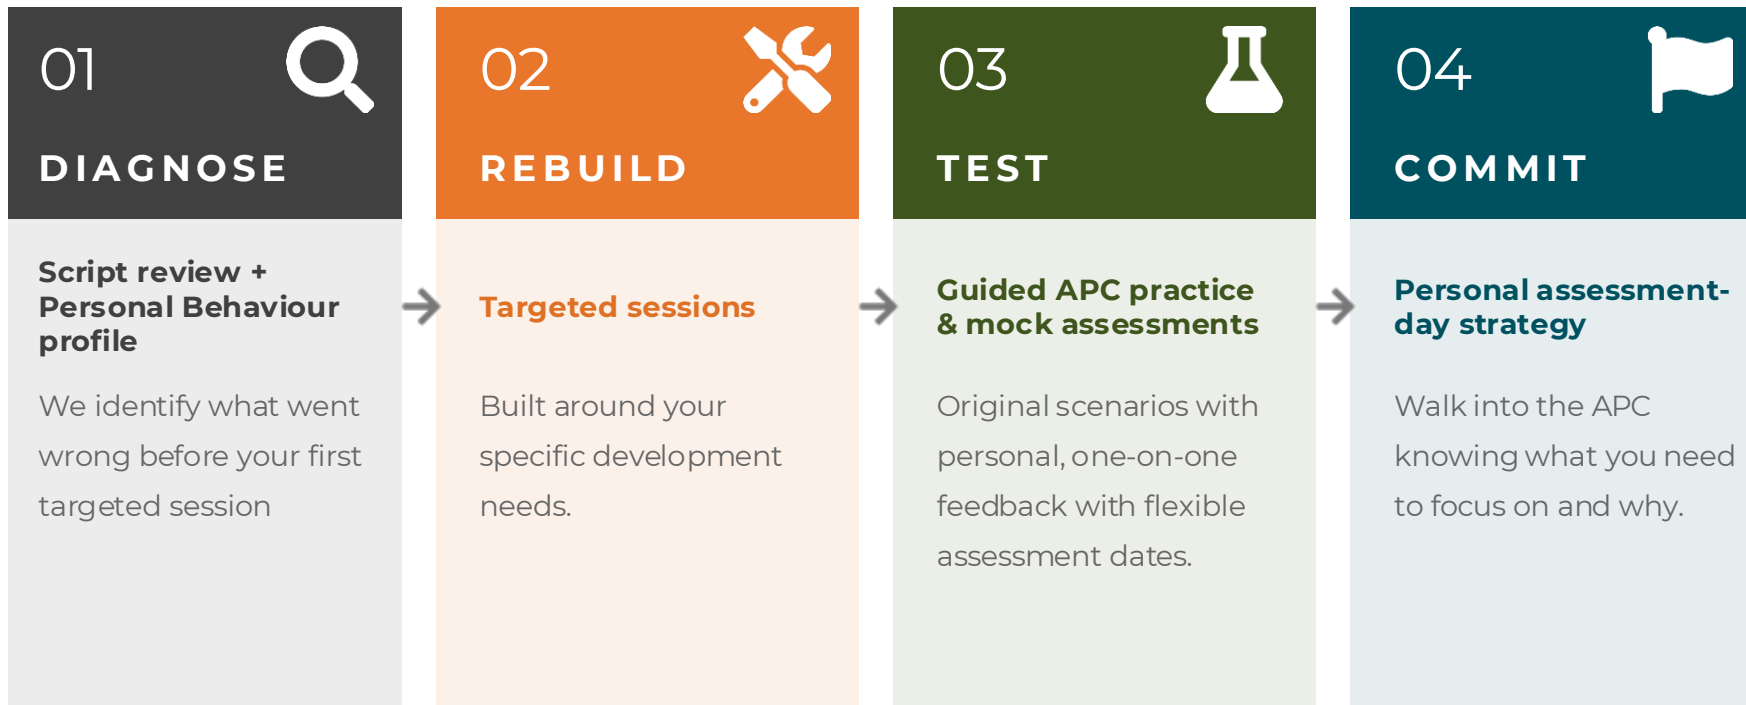

Repeaters need specific content to develop their skillset. They need to practice under pressure and receive feedback on their effort.

3

Overwhelmed trainees

Long programmes with too many sessions create passive attendees. Real change requires targeted content that drives improved outcomes.

A four-stage journey

We find out where it went wrong

Script Review

Our team analyses the trainee's APC script, task by task, against the examiner's marking framework.

We identify what went wrong per question, why, and what categories of failure it represents.

Behaviour Profile

Our behaviour analysis identifies how the trainee naturally thinks and communicates under pressure.

It maps to specific personality profiles that correlate directly with known examiner-identified failure patterns.

Six targeted sessions

1

Your Script Has a Story

What your paper reveals when you operate under pressure.

2

Answer the required

The discipline of reading exactly what is being asked, not what you prepared for.

3

Pre-release and information on the day

Trigger identification, flexible preparation to address the information on the day.

4

Breadth and Depth

How the APC marking grid rewards breadth AND depth and how to achieve both.

5

Ethical reasoning and communication

Professional judgement, ethics, clarity of expression and communication with various stakeholders.

6

Concluding clearly

Concluding with clear, supportive direction. Response structure and your personal assessment-day strategy.

APC simulations

Practice questions and Mock APC assessments

- ✓ Original scenarios: New company, industry and tasks
- ✓ Full pre-release information issued in advance of mock assessment day
- ✓ Information on the day + complete task set on assessment day
- ✓ Written under timed conditions simulating assessment pressure
- ✓ Marked by qualified facilitators against a full marking framework
- ✓ Task-by-task ratings: HC / C / BC / LC / NC

One-on-One feedback

After every mock assessment, a personal conversation that:

- ➔ Rates each task individually
- ➔ Explains where you went wrong and how to fix it
- ➔ Links back to the trainee's Behaviour Profile
- ➔ A personal tracker to show progress

What makes this approach different

1

Starts with diagnosis, not content. We review your APC assessment before deciding on your personal intervention.

2

Proprietary, purpose driven behaviour analysis, that incorporates your natural profile.

3

Every trainee receives a Personal Behaviour Profile to identify their natural behavioural tendencies under pressure.

4

Sessions aim to provide targeted intervention to develop your skills gaps. Developing technical and mental strength in every session.

5

Original mock assessments that assesses your progress.

6

Our approach is not to 'do more, try harder.' We help identify what went wrong and provide tools on how to fix it.

Repeaters who went through this journey

"What the course taught me is that I was always smart enough to pass this assessment. Being smart and diligent was never the issue. The issue was building on unfavourable habits, due to the fear of unlearning. Being placed in this uncomfortable position of unlearning and relearning is what built me to a place of high performance."

- APC Repeater

"The feedback from the mock assessments was really good - the markers highlighted where you went wrong and what you could have done better. There was definitely a personal touch throughout."

- APC Repeater

"The Atcor course forced me to identify the weak links and encouraged unlearning. I eventually felt free to unlearn the bad habits and past practices that had cost me attempt one."

- APC Repeater

Pricing plan for the APC Reimagined Programme

Past Script Review + behavioural analysis	Included
Personal Behaviour Profile + 1-on-1 feedback session	Included
6 × targeted group sessions (90 minutes each)	Included
Bridging practice questions + facilitated feedback	Included
Original mock APC assessments under simulated assessment circumstances	Included
1-on-1 feedback sessions after practice questions & mock assessments	Included
Final 1-on-1 coaching session	Included
Personal Exam-Day Strategy Document	Included
Business Writing Refresher	Included
Auditing Refresher	Included

R29 500

Optional add-ons
